

Doosan Forklift Parts

Doosan Forklift Parts - Doosan Infracore Company Ltd. is a transnational establishment consisting of Diesel Engines, Defense Industry products, Industrial Vehicles, Construction Technologies and Machine Tools and Mechanization Systems.

Their United States partner, Doosan Infracore America Corporation, operating in Suwanee, Georgia houses a 170,000 square foot manufacturing facility, home to a Compact Equipment and Construction division. Cleveland, Ohio houses the Lift Truck division, and West Caldwell, New Jersey has a Machine Tool department. The U.S. headquarters in Georgia facilitates a first rate parts operation capable of supplying an excess of 25,000 line items to support Lift Truck, Compact Equipment, Machine Tool and Construction consumer desires.

With a network consisting of over 90 autonomous dealers, the lift truck group supplies quality materials handling equipment to the comprehensive North American market. Doosan Infracore America Lift Truck dealers successfully operate in over 220 service and product sales locations all through Canada and the U.S. The forklift product line remarkably includes 63 distinctive models consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion lift trucks. Capacities of these various truck designs range from 3,000 to 33,000 lbs. All trucks are designed in an ISO 9001 qualified facility.

Doosan Infracore America is the fastest growing forklift business in the North American market, thanks to their stability in maintaining a high level of client service excellence and optimum product functioning to all Doosan Infracore Forklift users. The U.S. forklift division stationed in Cleveland has a expert team knowledgeable in Product Sales, Purchasing, Marketing, Logistical and Technical Support.

Korea's original home-based lift truck market was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. began to import assembled lift trucks as part of a national equipment expansion project. Initial product sales of this industrial equipment focused on large business groups, the armed services and on state-run firms. This ultimately led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced business operations throughout Korea to service and sell this heavy equipment. By 1978, a lift truck manufacturing plant was successfully completed. Continuous technical education became the new focus for improving quality and product development.

Daewoo started the first domestic lift truck business in 1967, and rapidly acquired a massive 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's sophisticated technological improvements combined with sales success placed them in a position of considerable expansion of their forklift operations.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a cooperative venture project to assist them in the highly competitive North American materials handling market. This joint-venture proved highly lucrative for Daewoo and their lift truck sales expanded greatly. In 1984, the company finished development of a new facility to help in producing high end value-added goods for export. In 1993, the company had a international sales network and started exporting designs they had established through in-house expertise, as an sovereign brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion opportunities into overseas markets.
