

Barrel Clamp

Barrel Clamps - A Barrel Clamp is actually a mechanical or hydraulic attachment designed for a lift truck. It can be utilized to compress the object you wish to transfer with the lift truck and is often used for handling barrels, kegs and paper rolls. A few designs of barrel clamp attachments also have a revolving function. Like for example, the rotate function enables the individual operating the forklift to be able to put in a vertically stored paper into the horizontal intake of a printing press.
