Clark Totalift, handles more than 120,000 specialized components designed for 20 distinctive brands of lift trucks and automated equipment. Your local Clark Dealer is your complete source for availability of all your components needs supplied by Clark Totalift.

Clark's exceptional Parts Distribution Centers are conveniently situated in Louisville, Kentucky, which serves both their consumers and sellers in North America, and Changwon, South Korea, which handles their Asian dealers and consumers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing manufacturers. Driven to provide the highest level of value and service to our users, Clark remains on the cutting edge when it comes to enhancing efficiency and benefiting performance.

Worldwide, Clark has one of the most outstanding dealer support networks. With over 550 locations worldwide, dealer representation in over 80 countries and 230 locations in North America, their high level of commitment to their customers predominates the material handling market.

By pioneering the operator restraint system protection feature, Clark proudly remains a leader of modernization in the industrial equipment and automated lift truck industry. This exceptional commitment to safety is at this time a customary feature on every forklift.

Clark has a relentless goal to have the No. 1 quality system in the industry which is demonstrated by their dedication to ISO standards. Clark, is the first manufacturer of forklifts and lift vehicles to be globally certified with quality standard ISO 9001 in all of its production plants. Also, the ISO 14001 Environmental Stewardship System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement permits Clark to be ready for any number of environmental restrictions, thus placing them in a dominant industry position.

Clark has selected the system of "Lean Production" at all of its assembly plants for the reason that this technique is extremely economical and enables minimal use of resources. Established to ensure maximum efficiency, this system is designed to discover and acknowledge the most efficient methods for manufacturing facility management. Clark has concluded this transition of its Korean plant. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and production efficiencies.

Clark's product engineers and suppliers join together to upgrade the efficiency and excellence of their products while minimizing costs. The new value engineering agenda combines progressive product improvement and provides superior customer support and service within the industry.
