

JLG Forklift Parts

JLG Forklift Parts - Following retirement in the late 1960's, John L. Grove embarked on a cross country RV expedition. After spending many years establishing his family built crane business with his brother, John had no idea that this journey would bring forth the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling equipment was the end result of a road trip.

Whilst on their journey, John spent time conversing with former business associates whom the Groves stopped to see along the way. These conversations combined with a tragic occurrence-two workers being electrocuted on scaffolding when the Groves were traveling to the Hoover Dam- John uncovered a vast marketplace for a product that could swiftly and safely lift individuals in the air to accomplish upkeep and other construction services.

After returning from their vacation, John set up a business with two of his friends and obtained a metal fabricating business in McConnellsburg, Pennsylvania. Opening with a small crew of twenty workers, they fashioned and sold their first JLG aerial work platform in 1970. The company incorporates many of the simple design essentials of that original lift into current designs.

JLG forklifts have come a long way from the time when Mr. John L. Grove returned to town from his cross-country road trip and since the first aerial work platform debuted on the market. Nowadays, the business proudly continues to expand itself into a range of markets worldwide and develops new products to make certain customers are capable of being more efficient and perform in the workplace within a safer atmosphere.
